Good game, nice and simple puzzler. Easy to learn the mechanics, later levels get pretty difficult.. Nice game with amazing music !!! :D Just buy it !. Great portal-like puzzle game! For one dollar it's really worth a shot. (Cool movie references btw). I got a couple of matches in the free demo, enjoyed it and bought it to get more features options.

Movement is good, there are three mech classes, light, medium and heavy with different weapons and abilities. Havnt explored multiplayer to its full potencial yet but i feel there is a lot of fun to be had there.

So i decided id try the single player campaign.

During the intro when one first gets into the mech i was really excited, you have more precise control over the hands and arms, moving your hands inside the cockpit causes the mechs arms to mimic the motions, you can punch things (missing from the multiplayer i think) and one feels really powerful, i got the VR giggles which i havnt got in a long time.

Then the game starts and you notice that all the control you have is over the arms, guns and shields, the mech walks by itself, singleplayer is a rail shooter :(

Im gonna give it a playthrough but i was dissapointed that single player has no free movement.

Singleplayer looks a bit nicer than the online mode, i cant put my finger on it precisely but i think resolution is lower in the multiplayer variant for some reason, might be a bug.

Update:

Im on vive and i downloaded Methados controller bindnings and made two changes.

Now my controls are as follows:

Left touchpad for movement, click it to jump.

Right touchpad clicks for snap turning.

Grip buttons toggle shields on\off on respective sides.

Top buttons change weapons.

Double click and hold on the right top button recenters HMD position.

With these settings the multiplayer is a lot nicer IMO.. This game is motorized Lego in a nutshell. Unlike other complecated craft games, it's very easy to play. Keep in mind the game is still under development, so it's constantly changing! The developers are very friendly and they're continuing to try new things. The only limit is your imagination.. BEST DLC EXPERIENCE I'VE EVER HAD

felt awesome while looking back to the city on the bridge after saving everyone and taking my way back to the Capital Wasteland :")

Oh, and don't even think about jumping off from the bridge :))))))

The devs came through on real character customization! So i changed my review :). A tilting high-speed legend that is ruined by stingy virgin not liscencing their livery, still worth getting.. even though the game design is beautiful, both graphics and plot wise the game is a bit lacking, even tho that's completely personal opinion; mainly I got many problems saving and loading, it lags with animations and between scene cuts. I tried to finish at least one route but it was almost impossible.. Everybody who likes Bud & Terence will probably like this game. ;)

Fun gameplay, charming retro pixel graphics, awesome soundtrack

. If you enjoy invaders-style games, this one is a must. It's also quite funny.
