About This Content

Spanning the North Wales Coast Line from Crewe to Llandudno, and also featuring the iconic Conwy Castle across 67 miles of cross-border railway line, Train Simulator's North Wales Coastal route marries seaside views with both local and inter-city services from Arriva Trains Wales and Virgin Trains West Coast.

Ever since the Act of Union in 1801, which saw Ireland become part of the United Kingdom, people have strived to improve the connection between the two isles. In the early 19th Century, a combination of horse-drawn transport and sailing ships was the only option; that was until the 1840s, when the Chester and Crewe Railway and later, the Chester and Holyhead Railway were incorporated.

The full line was soon completed in 1848. Irish Mail would regularly work the line from London to Holyhead, and the LNWR, being in control of the West Coast Main Line and the line to Holyhead soon after, saw an opportunity for a spike in tourist traffic. Trains were put on to serve seaside resorts like Rhyl, Colwyn Bay and along the Llandudno branch, setting in stone the line's popularity. This tale would continue through the Big Four, British Railways and Sectorisation eras, and despite freight being less common today, the line has remained a local and long-distance passenger haven with over 90 trains a day.

Visit the seaside today with North Wales Coastal: Crewe – Llandudno, featuring the Virgin Trains BR Class 221 "Super Voyager", and Arriva Trains Wales' BR Class 158 "Express Sprinter" and BR Class 175 "Coradia" DMUs.

Awesome idea! Love the financial support of the creator community.

The game is also quite fun and cute!. If you're looking for a quick and easy game, this isn't it. But it's fun. And it challenges your risk/reward perception right from the start.. This game was amazing! Back when it had players, at least. Sadly, the already-struggling game was killed when Uber decided to release Super Monday Night Combat, which was then killed off as well. I wish this game were still alive. If it were, there'd be reason to play it. There's none, now.

EDIT: I should probably add this to the review: There is still a group on steam that plays the game, but don't expect to see more than one server with people on it -ever- (and I love this group for that, I missed this game so badly), and don't expect to see even that 80% of the time.. For what it tries to be, it is good. A unique feature is that ships can move in 3D, which is strangely a rare thing in the space RTS genre. Controls are a bit clunky. Somewhere between Homeworld and FTL.. FIRST 5 MIN OF A HACKER GAME IS BEEING FORED TO ACCEPT AN UNKOWN .EXE? BROKEN BY DESIGN. Normally I devour the works of Neil Gaiman like an Osedax worm devouring a whale carcass; but this game was a huge disappointment to me. The story seems like it could have been really interesting...such a shame that it was completely eclipsed by the soul-crushing monotony of the gameplay. So much repetitive clicking. I appreciated the tone of the game - very ooky-spooky and therefore right up my alley. Overall I think I'd have preferred that Gaiman stuck to his wheelhouse and wrote this as a novella, graphic novel or similar.. As a beginner, I found Sprinter Pro to be intuitive and easy to pickup and make quality animations. It enabled me to make a great looking character animation for my first video game. The developer also provides easy to follow video tutorials which are detailed and made me super productive very quickly.

I had to download a certain software that added another gaming app for Silverfall to run then the app stops working and so does my game. So I go to redownload and the app is no longer needed and no i hav e a game that I can't play anymore nor redownload. Yes, i have tried removing it from my library and my whole computer (even tried it on a diferent computer still nothing).

As for the game it's very slow paced and the style is nto so much my taste but good for a very weak D&D type.. Manager spends entire day in his office.

Most accurate retail management sim ever.. Got every it said I would get, So yeah its ok. ERROR ON WINDOWS 10 and not playable, strange thought it was working fine before.. Not too sure if this only occurs on my game, But it seams to happen every time,
In that upon fighting the second boss, He respawns 4 times in a row, then on the 5th, the game locks up and the AI refuses to make their turn.

Only 45 minutes of gameplay really at the moment until this gets patched
This game is almost identical to the Flash game "sands of the coliseum" however with much less features.
I hope this game improves. Money grab for a dead game. The premise is quite non intuitive. You need to pay for features of a half baked game.. Meh. Nice music (I didn't know it's CC licensed). I'll probably never touch this again.. press t when you are driving bertha to install an edgy train horn. Repetitive, over and over again repetitive.. it wont let me get the upgrade pack
